

THINPREP[®] MULTICYTE[™] REMOTE IMAGING SYSTEM

The "Centrum voor Medische Analyse" (CMA laboratory) in Herentals Belgium is one the biggest private laboratories in Belgium.

In September 2006, Europe's first MultiCyte unit was installed in Herentals. The laboratory is successfully managed by Dr Pierre van Hoorde (Director - Pierre.van.hoorde@cma.be), Dr Frans Engelen (Clinical Biologist) and Mr Mathieu Luurssen (Head of Pathology Department). This modernised cytology laboratory purchased an additional ThinPrep 3000 processor, which was fully installed in March by the Field Service team. Herentals is the first laboratory in Benelux with two ThinPrep 3000 processors and the MultiCyte ThinPrep Imaging System.

HERENTALS CYTOLOGY LABORATORY STAFF

MULTICYTE LABORATORY IN ACTION. THE ONLY LABORATORY IN BENELUX WITH 2 THINPREP 3000
